## **DETAILED ACTION**

### ***Status of Claims***

1. Claims 1-21 are pending.
2. Claims 7-17 are elected and rejected.
3. Claims 1-6 and 18-21 are non-elected and withdrawn from consideration.

### ***Election/Restrictions***

4. Applicant's election with traverse of Group II, corresponding to claims 7-17, in Paper No. 4 is acknowledged. The traversal is on the ground(s) that these groups are not restrictable. This is not found persuasive because each of the three Groups are directed to separate and distinct inventions as discussed in the Restriction of April 11, 2002, Paper No. 3.

The requirement is still deemed proper and is therefore made FINAL.

### ***Information Disclosure Statement***

5. The information disclosure statement filed on December 19, 2000 has been reviewed and considered, see enclosed copy of PTO FORM 1449.

### ***Claim Objections***

6. Claim 7 is objected to because of the following informalities: this claim ends with two (2) periods at the end of the sentence. Appropriate correction is required.

***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

9. Claims 7-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Costello et al. Costello et al. teach of the expression of B7 molecules by antigen-presenting cells provides stimulatory signals to T lymphocytes. Costello et al. also disclose of the up-regulation of B7 molecules by an up-regulating molecule, (see abstract). The prior art reference of Costello et al. is silent to the administration of glucan but does teach of up-regulating agents. Accordingly, it would have been obvious to one having ordinary skill in the art to utilize agents which are known to up-regulate the B7 molecules in order to increase the immune system, as taught by Costello et al.
